R-7651-EM Embedded Mount Martello Bollard

The R-7651-EM Martello Bollard offers a unique blend of functionality and aesthetics--designed to draw vehicle attention and protect pedestrian areas. Conceptualized by Billings Jackson Design, its obtuse shape is modelled after historic Martello towers once prized as defensive outposts due to their solid form and construction. R-7651-EM bollards are embedded in ground to ensure a high level of impact protection. Steel construction comes powder coated in 1 of 6 standard colors. Copyright Billings Jackson Design.
